# Pranav Divichenchu

U.S. Citizen | (571) 491-5164 | pranavdivichenchu@gmail.com | linkedin.com/in/pranav-divichenchu | github.com/PranavDivichenchu

## EDUCATION

**Georgia Institute of Technology** Atlanta, GA
*B.S. Computer Science, Concentration in AI and Systems & Architecture* **May 2028**
**Relevant Coursework:** Linear Algebra, Multivariable Calculus, OOP, Data Structures & Algorithms

## EXPERIENCE

**Karana: Spiritual Learning & Recitation App** Remote
*Founder* **Aug 2026 – Present**
- Built a prayer-learning app on Node/Express and Supabase Postgres; **1M views**, **5,000 users**, **$1.5K profit**.
- Shipped to the App Store and Google Play with Capacitor, RevenueCat purchases, and Google sign-in.
- Seeded 58 prayers, 700 Gita verses, 75 festivals, and 7 courses into Postgres in 11 languages.
- Generated **10,000+** narration clips offline with open-source Indic TTS models in PyTorch.

**FHIR** Atlanta, GA
*Software Engineer* **Aug 2026 – Present**
- Mapped 742 Cerner FHIR MedicationRequests to the **14 active orders** the Medications tab shows.
- Set up SMART on FHIR backend auth for the Flask API with RS384 JWTs, a hosted JWKS, and 6 scopes.
- Wrote JSON API contracts for 4 patient tabs and an async Swift client tested with Swift Testing.

**Cloud9** Remote
*AI Intern, Infrastructure* **Jul 2026 – Aug 2026**
- Built a buyer–vendor marketplace from scratch as Python services on Cloud Run and Cloud Functions.
- Wrote a Python scoring pipeline ranking offerings from **200+ vendors** by price and fit to buyer needs.
- Split ingestion, storage, and matching into separate GCP services and launched, matching **100 buyers**.

**Politheon** Remote
*Machine Learning Engineering Intern* **Jun 2026 – Aug 2026**
- Trained a LightGBM bill-passage classifier on 4,200 TF-IDF and 10 engineered features (**+15% accuracy**).
- Split data by bill group and stripped stage-code leakage, reaching **83% macro F1** (82.5% in 5-fold CV).
- Built SQLite FTS5 keyword and LSA semantic search over 2,000 bills with a CLI and Streamlit UI.

**University of Missouri, Trulaske College of Business** Columbia, MO
*Research Intern* **Jun 2024 – May 2025**
- Scored **13M+** news articles with FinBERT, lexicons, and an LLM API into daily signals with **60% accuracy**.
- Wrote a Python pipeline aggregating sentiment per security per day; the strategy grew **1.5x** in backtests.
- Co-authored a *Journal of Finance* submission on a hedge-fund strategy with Prof. Kuntara Pukthuanthong.

## PROJECTS

**Khali: Short-Form News App** | *SwiftUI, Supabase* **Dec 2025 – Mar 2026**
- Co-founded a "TikTok for news" SwiftUI app (MVVM, Combine) with **1,000+** App Store downloads.
- Merged each story's coverage from many outlets into one Supabase-backed card with left/right views.
- Added two-voice podcast audio with timestamped captions (AVFoundation) and agree/disagree voting.

**B2Alpha: Decentralized AI-Agent Infrastructure** | *Go, Rust, PostgreSQL, gRPC* **Jan 2026 – Apr 2026**
- Wrote Go routing nodes that relay signed agent messages over gRPC and WebSockets using Protobuf.
- Verified DIDs and Ed25519 signatures on every node; built a Rust gRPC agent registry on PostgreSQL.
- Integrated Stripe Connect via Supabase edge functions for agent-to-business payments and onboarding.
- Shipped Python and TypeScript SDKs (**84 tests**) and a Twilio/Deepgram/ElevenLabs phone-call bridge.

**Nexus: AI-Powered Learning Platform** | *Next.js, Supabase, LangGraph, Gemini, Kaplay.js* **Feb 2026**
- Won **Best Education Hack** at GMU: a Next.js app that turns one lesson into a game, a video, and a song.
- Built a 5-agent LangGraph pipeline on Gemini that plans, codes, and play-tests Kaplay.js games.
- Grounded code generation in Kaplay.js docs with ChromaDB RAG and caught crashes in headless Playwright.
- Rendered lesson videos with Remotion and built Supabase classrooms, assignments, and analytics.

## TECHNICAL SKILLS

**Languages:** Python, Java, C++, C#, Go, Rust, TypeScript, JavaScript, Swift, SQL, R, Bash, HTML/CSS
**Frameworks & ML:** Next.js, Node.js, Flask, SwiftUI, LangGraph, PyTorch, Hugging Face, LightGBM
**Cloud & Infrastructure:** GCP (Cloud Run, Cloud Functions), PostgreSQL, Supabase, gRPC, Stripe, FHIR
